

Create your own gecko climber!

Cut out the shape and stick some tape onto the back to make your very own knob-tailed gecko climber.

Did you know?

- Unlike most other lizards, geckos are able to vocalise producing clicks, chirps and other sounds to communicate with one another.
- Most geckos can detach their tails - and regrow them later if necessary.
- There are over 1100 different species of geckos making them one of the most diverse lizard groups in the world.
- Geckos are mostly nocturnal animals.
